Private Bookmarks

This extension is an experimental app that will bring you several benefits at the same time. It will protect your bookmarks and other items, along with other data that you want to keep away from others. The extension will show a dialog to you with a list of saved bookmarks when you click on the extension's icon. The list will show you which URLs you have saved. You will then be required to enter a password for the bookmarks. Once the passwords are set, the list will show the URL of each bookmark in a different color. The extension will protect your bookmarks from prying eyes, even if you are using private browsing. It will protect your favorites from others to prevent them from being tampered with or deleted. The app also has a backup feature that will allow you to export your bookmark URLs to a text file and later import it to the bookmarks to restore the deleted bookmarks. If you are experiencing some issues with your Firefox browser, you can also use this app's deleter to remove old data from your computer. You will have to focus on your privacy, in particular when you share your computer with other people, at work or at school, for example. This small app is ideal when it comes to keeping your bookmarks secret. Privacy & Security Description:You have to focus on your privacy, in particular when you share your computer with other people, at work or at school, for example. This small app is ideal when it comes to keeping your bookmarks secret. With a dark mode theme and other features like Auto-lock, the backup reminder, export and import, and a data deleter, this Firefox extension brings everything a particular user expects from such an add-on. The downsides of this extension are not many but are severe, some users say While I couldn't find any issues or bugs during the time I tested the app, some users complained that the extension stops recognizing the saved PIN code for the password-protected folder. That is a considerable glitch since it also causes the users to lose all the bookmarks that they saved. However, the dev said that Private Bookmarks is an alpha release at the moment, so he recommended us to frequently backup bookmarks so as not to lose them in case the app crashes. Description: This extension is an experimental app that will bring you several benefits at the same time. It will protect your bookmarks and other items, along with other data that you want to keep away from others.

What's New In?

For all your bookmarks you want to keep secret, Private Bookmarks is the best add-on for you. This Firefox extension will set up a folder for your bookmarks. There are no more codes that you have to remember for a longer time. Just set the password of the folder you want to protect and every time you open the folder it will ask you to unlock it. It will always be unlocked and you can keep your favorites safe from anyone who will ever find the folder. This extension is simple and intuitive. You will only have to focus on your privacy and make sure that no one can see where you saved those sensitive links. I found the extension to be quite reliable. There are no more issues regarding crashes, it just works. The downside of the app is the fact that it is still in its alpha stage and the crashes and bugs that some users encountered were annoying. Some users have also reported that the application is not compatible with all types of devices. Meta Comments and ratings for Private Bookmarks: Enhanced Privacy for Bookmarking – Firefox (4.8 stars) 4 8 Virgilius7 This extension is great for blocking private browsing. It is also very easy to use. I like how it takes the saved password from private browsing and stores it. Once you are logged in it takes your saved password for any of your bookmarks, e-mail or other things you have set up.
